Summary

Highly motivated and skilled computer science professional with a strong foundation in software development, mobile app creation, and system design. Proficient in building scalable applications using Flutter, Next.js, React, JavaScript, Python, Laravel, Firebase, React Native, Convex, Vercel, and Supabase, with proven experience in Play Store and Apple Store Connect management. I have delivered innovative solutions such as the Salary Requisition Management System and agromarketing apps. A collaborative team player with excellent problem-solving skills and a passion for leveraging technology to drive efficiency, while upholding professional ethics and confidentiality.

Experience

Lead Mobile App Developer

Kolaborate Platforms Africa (Ntinda)

Oct 2025 – Present

- Lead React Native development from concept to launch, architecting the application's technical foundation.
- Mentor developers and enforce best coding practices, ensuring high code quality and maintainability.
- Manage database integrations and backend services, including Firebase and Convex.
- Oversee Google Play Store and Apple Store submissions, handling releases and compliance.

Lead Developer

Hamis Thread Stores (Fort Portal)

July 2025 – Oct 2025

- Managed full project lifecycle: field data collection, planning, wireframing, coding, testing, and deployment.

- Built a mobile app for inventory management and sales tracking using Flutter and Supabase.
- Delivered a responsive web-based version with Next.js, Tailwind, and Vercel.

Website Project Manager

Kigata Technical Institute (Kabale)

Mar 2023 – May 2023

- Designed wireframes and developed the institute's responsive website using HTML, CSS, Bootstrap, and JavaScript.
- Hosted the website via GitHub Pages, ensuring availability and performance.

Key Projects

- **BlueSky AI (Web App)** – PWA for automating posts on BlueSky using Next.js, React, and Convex.
- **Diabetes Patient Care App** – Android app for health tracking using Flutter, Supabase, and Dart.
- **Salary Requisition Management System** – Web system for MMU to streamline part-time staff salary requisitions (Flutter, Supabase, Dart).
- **CoffeeLink Agro-Marketing App** – Mobile app for farmers to access market prices and buyer connections (Flutter, Supabase, Dart).
- **Attendance Management System** – Face recognition-based system using Python, OpenCV, and SQLite.
- **PrismX (Web & Mobile)** – Real-time field agent tracking with Google Maps (Next.js, React Native, Convex, Clerk, Firebase).
- **Grow Mobile & Flex (Mobile/Web)** – Live apps on Play Store for service access and forex bureau operations (React Native, Convex, Expo, Firebase).

Education

Mountains of the Moon University (MMU)

Bachelor of Science in Computer Science

2022 – 2026

St. Henry's College Gangu

Uganda Advanced Certificate of Education (UACE) – 2018–2019

Uganda Certificate of Education (UCE) – 2014–2017

Licenses & Certifications

- Basics of Machine Learning – Great Learning Academy
- Python Fundamentals for Beginners – Great Learning Academy
- React JS Tutorial – Great Learning Academy
- UI/UX for Beginners – Great Learning Academy
- Introduction to Ethical Hacking – Great Learning Academy
- Face Recognition in OpenCV – Great Learning Academy
- GO Programming Language – Great Learning Academy
- Introduction to JavaScript – Great Learning Academy
- Java Programming – Great Learning Academy

Leadership and Volunteer Experience

- **Peer Mentor** – Shared knowledge and mentored fellow students in software development, coding best practices, and UI/UX design.
- **Open Source Explorer** – Actively explore open-source projects and contribute to technical communities.
- **Sports Volunteer** – Participated in the Association of Uganda University Sports Games (Diploma of Participation, Dec 2023).

Skills

- **Programming Languages:** Flutter, Next.js, React, JavaScript, Python, Laravel, PHP, React Native, Dart, Java, Go
- **Tools & Platforms:** Firebase, Supabase, Convex, Vercel, Clerk, Expo, Git, GitHub, SQLite, OpenCV, Tailwind, Bootstrap
- **Other:** Mobile app development (iOS/Android), Web development, UI/UX design basics, Google Play Store & Apple Store Connect management, Database integrations, Real-time tracking (Google Maps API)
